

PermitLink™

End the paper chase.

PermitLink™ is much more than a way to organize your documents. It's a tool that empowers organizations to drastically reduce their dependency on paper-based forms, while streamlining internal processes, workflows and related tasking. This powerful application serves to ensure data integrity and maximize efficiencies as teams perform essential tasking associated with data capture, approval processes, calculations and reporting. Best of all, PermitLink™ connects teams in real-time (within the office or elsewhere) through a simple, intuitive interface and via a variety of Web-enabled devices.
